Professional Summary

Motivated B.Tech Computer Science student specializing in AI/ML with a strong foundation in C++, Java, and Python. Passionate about building scalable applications and solving complex problems, I am eager to contribute to innovative engineering teams.

Education

B.Tech in Computer Science (AI & ML), Bansal Institute of Science and Technology, Bhopal |
Sept 2023 – June 2027 | CGPA: 7.83

Technical Skills

- Proficient in programming languages including C++, Java, Python, SQL, HTML, CSS, and JavaScript.
- Strong foundation in core computer science concepts such as DSA, OOP, DBMS, OS, and Computer Networks.
- Experienced with development tools and platforms including Git, GitHub, VS Code, and MySQL.

Projects

Campus Placement Management System (Ongoing)

- Developing a web-based system with secure authentication and separate dashboards for students, recruiters, and admins.
- Integrated a MySQL database for efficient management of job applications, profiles, and recruitment records.
- Utilizing Flask and Python to implement clean, modular code following SDLC best practices.
- Tech: Python, Flask, MySQL, HTML/CSS, JS, Git.

Crop Recommendation System | Python, Scikit-learn, Random Forest

- Built an automated query resolution system to streamline student inquiries regarding admissions and schedules.
- Integrated a logic-based response system that reduced human administrative intervention by approximately **30%**.
- Focused on user experience design to handle edge-case queries and improve real-time engagement.
